# The TGV-2600 trailer mounted combination unit combines system to clean and remove debris from sanitary and storm soil using the hydro—excavation method. Other applications include telecommunications vaults, skimming grease from disposal sewer cleaning and vacuum conveyance work.

Quick Flange Locks allow for the quick disconnection and replacement of vacuum tubes to accommodate the depth or distance of the debris to be removed.

Hydraulic Boom Extension gives the boom an extra 60" of reach for getting to those difficult off road jobs.

600 Gallon Debris Tank (3 cubic yard) gives you more than ample storage for most jobs.

High Pressure Water  
The water pump will pump 1000 gallons per minute at 1000 psi for all of your sewer cleaning and hydro excavation work.

Rear Door features mechanical over hydraulic locks for positive sealing

Liquid discharge system will pump off excess liquid. This limits the amount of liquid in the debris tank leaving more room for solid debris

Convenient Tube Storage makes it easy to start a job fast.

Rear Mounted Hose Reel the rear mounted position of the hose reel allows you to clean and vac at the same time while being safely out of the way of traffic. The reel can hold up to 600' of 3/4" sewer hose.

**safety and compact size to provide the most effective  
sewer lines. It also allows you to safely dig and remove  
ns include the cleaning of catch basins, lift stations,  
digesters, sand, gravel, camp latrines, and all general**

**System -  
deliver 40  
t 2000 PSI  
cleaning  
n needs.**

**Industrial Worm Gear Drive** is standard on the TGV-2600. The worm drive provides hydraulic rotation through a 320° arc making placement of the flexible vacuum hose easy and accurate.

**Power Plant** - The TGV-2600 is powered by a powerful diesel engine coupled to a multi drive gear box and independent hydraulic motors to efficiently run both the positive displacement blower and the high pressure water pump.

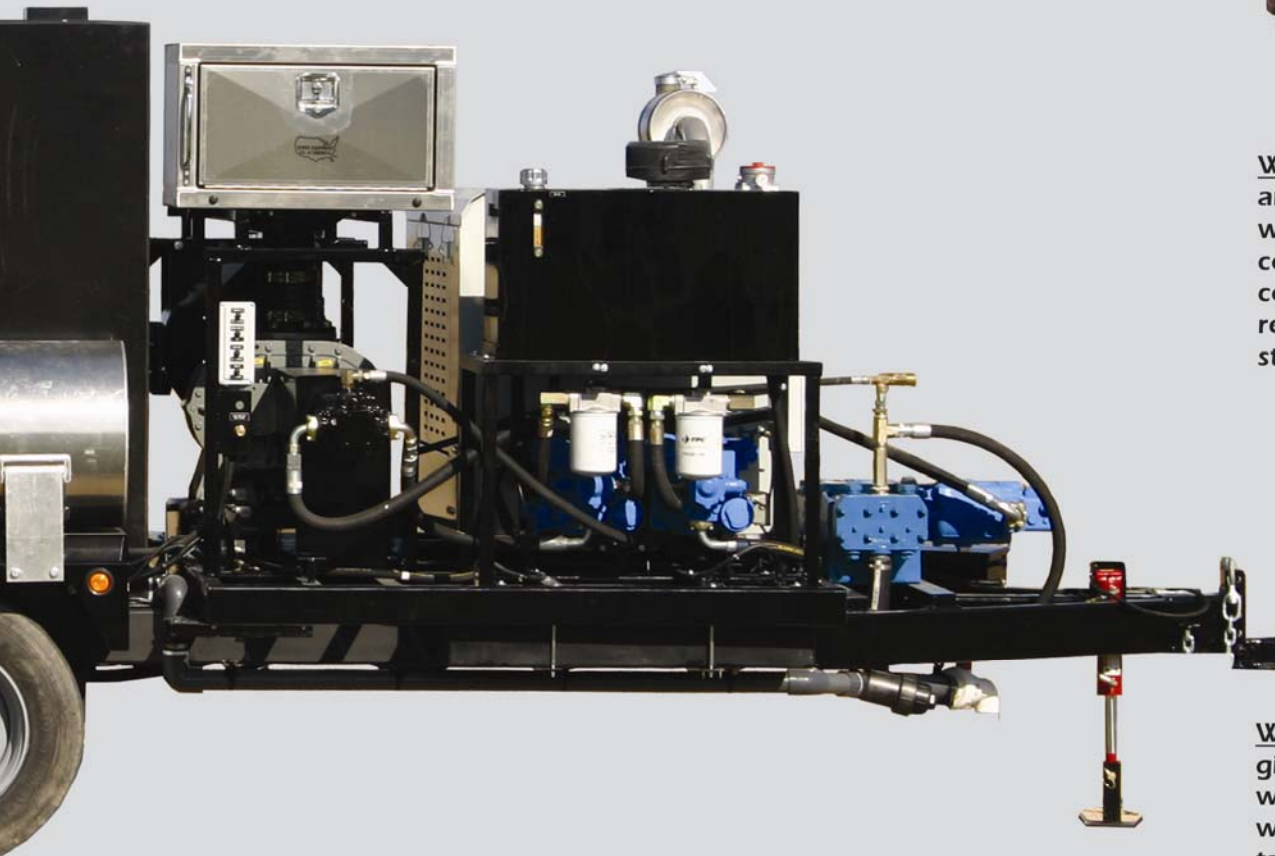

**1,400 CFM Positive Displacement Blower** is standard on the TGV-2600 combination unit.

**Watertight Controls** are contained in a weatherproof NEMA 4 control box located conveniently at the rear hose reel work station.

**Wireless Remote** gives the freedom to work independently without the worry of tangled cords.
