CAMEL FEATURES

Debris Body

Collector body constructed of 1/4" steel, cylindrical in design and available in 6, 10 and 16 cu. yd. capacities.

Water Tank System

3/8" rotationally molded, non-cross linked polyethylene with ultraviolet stabilizer. Available in 500, 1,000 and 1,500 gallon capacities.

High Pressure Water System

Uses a continuous flow and pressure positive displacement triplex water pump. Rated capacities from 30 GPM up to 120 GPM and available pressures up to 3,000 PSI.

Vacuum System

Utilizes a rotary lobe positive displacement "Roots" type vacuum pump with airflow capacities from 0-8,000 CFM and vacuum capabilities up to 28" HG.

Vacuum Boom

The power boom has a full 210-degree hydraulic worm gear rotation and is lockable in any position. Available with 5' and 8' true telescopic extensions.

Sewer Hose Reel

A variety of standard and custom reels are offered in one of two mounting positions. The front mounted manual or hydraulic reel with full 180-degree rotation is available. Or, you can choose our exclusive state of the art behind-the-cab reel mount. Hose reels are available to hold up to 1,000' of 1" sewer hose.

Power Take Off Drive System

Single engine efficiency for all operations. Functions are driven via a split shaft transfer case with 8-Bolt hot shift PTO drive. Also available with the Allison New World automatic transmission 10-Bolt hot shift drive.

Unloading System

Camel offers two types of unloading systems. The standard tip to dump system utilizes a 50-degree dump angle. The second is our exclusive hydraulically operated, full diameter ejector plate system that empties the contents without the need to elevate the body. This feature is also available with our Super-Pak dewatering system. Super-Pak combines the benefits of the ejector plate squeezing out more liquid than ever before and transporting solids to the dumpsite.

HYDRO EXCAVATING OPTIONS

- Safely and quickly locate and excavate buried utilities

- Cyclone separator removes material from airstream
- Large clean-out and drain
- Pleated element final filter
- Longer blower life

- Adjustable heater
- Heat water on demand
- Thaw frozen soil
- Vacuum heavy clays
- Recirculate when mobile

- Non-destructive digging when locating or digging near underground utilities

- 110V GFI receptacle
- Power where you need it
- Lock-out, tag-out where combustible atmosphere is present
